

Freedom of Information Request FOI 18 12

Rescue of other emergency services

Query

Please can you tell me how many times each year for the past three years officers from you fire and rescue service have been called to rescue officers on duty for other blue light emergency services such as the police and ambulance services.

Please can you state the nature of each call out, as in how the emergency services officer needed to be rescued, the area it happened and the outcome of the call out.

Response:

We have no record of rescuing anyone from other emergency services over the last 3 years so this information is not held.
