Can you match the labels to the correct pictures

PREGNANT SHARK

Most shark's babies stay inside their mother's body for a long time (sometimes over 2 years).

PUPS

The pups swim away once they are born. They do not need any further care from their mother. They are born with a full set of teeth.

SHARK

Most sharks live for between 20 and 30 years. However, Whale Sharks can live as long as 100 years.
