Home Task - My escape plan

It is important to know the escape plan for any building you are in and practise it regularly. When you are at school you practise what to do if there is a fire and it is a good idea to do this at home too. Practising makes sure that if there is a fire, everyone knows what to do and gets out of the building quickly.
Task - You are going to create an escape plan for your home and make sure everyone at home knows what to do if there is a fire.

Plan A

This is the normal route you take when you leave your home.

Plan A

_____

_____

_____

_____

Plan B

If your first route is blocked, you need to think of another way to safely exit the building.

- Is there another door you could use?
- Could you safely climb out of a ground floor window?

Plan B

_____

_____

_____

_____

If I can't get out….

If you can't use these escape routes, find a room with a window.

- Close the door.
- Block the gap at the bottom of the door with clothes and blankets to stop the smoke entering.
- Open the window and shout for help. If you have anything brightly coloured, hang this out of the window.
- If there is a phone in the room, call 999 for the Fire & Rescue Service and tell them where you are. If there isn't a phone, then shout "Fire" out of the window as loudly as you can.

Once outside

Once outside you meet at your meeting point.
Phone 999 and ask for the Fire and Rescue Service.

Our meeting point is…

_____
