DORSET & WILTSHIRE FIRE AND RESCUE

DWISE

Escape plan answers

1. When the smoke detector starts to beep you need to get out the home.
2. If the door is shut, use the back of your hand to test it is cold, before you open it.
3. If there is smoke, crawl under it so you don't breathe it in.
4. Go down the stairs carefully. They should be clear of anything you could trip over.
5. Keep the keys near the doors and windows so you can get out quickly.
6. Head to your nearest way out of the building (normally your usual exit).
7. Have a meeting point outside, safely away from the building e.g. a tree.
8. Call 999. Tell them the address (including the postcode) clearly so they know where to go.
