

DORSET & WILTSHIRE
FIRE AND RESCUE
AUTHORITY

Fire Station Closure Consultation

**PUBLIC CONSULTATION
IS OPEN FROM:**
Friday 13th February 2026
until Friday 15th May 2026

This is your chance to have
your say about our proposals

INTRODUCTION

What we're proposing

We're suggesting to the community the possible closure of eight on-call* fire stations, four in Dorset and four in Wiltshire.

Your Fire and Rescue Authority is legally required to provide a fire and rescue service to the communities of Dorset and Wiltshire. We must continually scrutinise and review this service to make sure it works well, makes best use of public money and runs smoothly.

Why we're proposing it

We've been looking at information and data about all our fire stations. This helps us understand how busy they are, what risks they face and, for stations with on-call firefighters, how often fire engines are ready to go. Our initial analysis considered:

- the demand placed on stations by incidents,
- the community impact of fire station removal including:
 - the travel time to the next nearest Dorset & Wiltshire Fire and Rescue Service station,
 - proximity to a full time/wholetime duty station,
 - non-removal of two neighbouring stations.

Following this analysis, we shortlisted these eight stations:

- Bradford on Avon
- Charmouth
- Cranborne
- Hamworthy
- Maiden Newton
- Mere
- Ramsbury
- Wilton

* Firefighters at on-call fire stations live or work near to the station and respond when alerted

We used data from the last six years to consider:

- how busy the station is,
- how quickly and how often the station is able to respond to incidents,
- how could other fire engines nearby respond to these incidents,
- the financial impact of closing the fire station,
- existing and possible future risk in these communities,
- how we meet the changing needs of the community.

These proposals would save money and make sure we can still provide fire and rescue services across Dorset and Wiltshire, when you need us.

What this doesn't mean

We know closing fire stations might sound worrying and will not be a welcome decision for our communities. That's why we've looked very carefully at all the facts to make sure we're doing the right thing with the money and people we have. We understand you care about what this means for where you live. Before we make any decisions, we want to hear from you. Tell us what you think and if there's anything important that we might have missed.

We want your views on these proposals so that we can understand what is important to you, what our focus should be, and how we can meet our future financial challenges. The Authority has not yet decided on these proposals. Your feedback will help us decide what is best for Dorset & Wiltshire Fire and Rescue Service.

How you can have your say

The consultation is open from Friday 13th February until Friday 15th May 2026.

We will be holding public meetings in each affected town or village, to allow you to understand the data and impact of a closure and give us your thoughts. We'll also be holding online dial in sessions for each town or village. We have a consultation questionnaire which we'd encourage you to complete as well so we can collect all feedback.

Premier Advisory Group, an independent company, are supporting us with this public consultation. They will provide us with a report so we can review all the responses, before the Fire Authority makes the final decision at their meeting on Tuesday 30th June 2026.

FROM THE CHAIR AND CFO

Cllr Clare Weight

Chair of the Fire and
Rescue Authority

Andy Cole QFSM

Chief Fire Officer

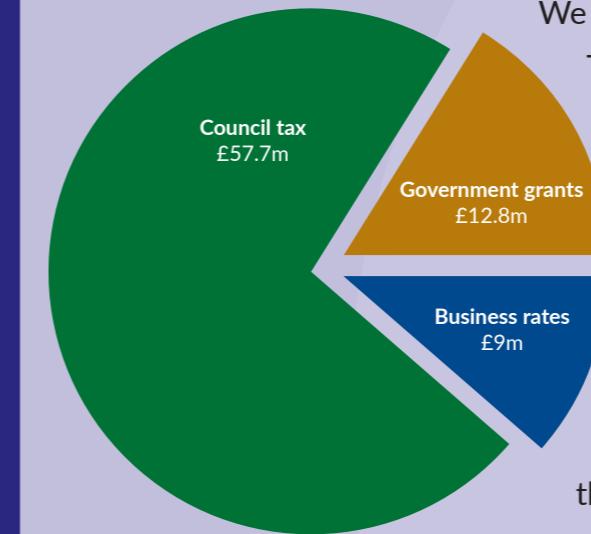

As Chair of the Fire and Rescue Authority and Chief Fire Officer, our first responsibility is to keep people safe. That means making sure we have the right people and equipment in the right places, and that we can afford to sustain that for the long term.

We are a large Service made up of a dedicated and professional workforce that provide our response across 50 fire stations. We have 36 on-call stations, four wholetime only stations, five wholetime stations with an on-call section and five day duty stations with an on-call section. We manage our resources 24 hours a day to get you what you need when you need it, that does not always mean it will be your local fire engine.

Changes have already been made across all parts of our Service to save money and match our resources to where our risks are. Since the combination of Dorset and Wiltshire Fire and Rescue Services in 2016, we have saved £15.1m. During 2024/25, we have saved nearly £1m through further efficiencies. We will continue to look at the service we provide across all of our communities as a whole.

The proposal to close fire stations is a matter for the Fire and Rescue Authority. Whilst nobody wants to make these difficult decisions, we must maintain a sustainable and safe fire and rescue service. Although these proposals will save us money, the data is also telling us it's the right thing to do.

OUR FINANCIAL POSITION

We have an annual budget of £79.5 million for 2026-27. This is made up of 16% grant from Government, 11% from business rates and 73% from council tax. Over time, government grant has not kept up with our costs, so a greater share of our budget now comes from council tax – it has increased from 63% to 73% since 2015-16.

At our most recent meeting, the Authority agreed to increase its share

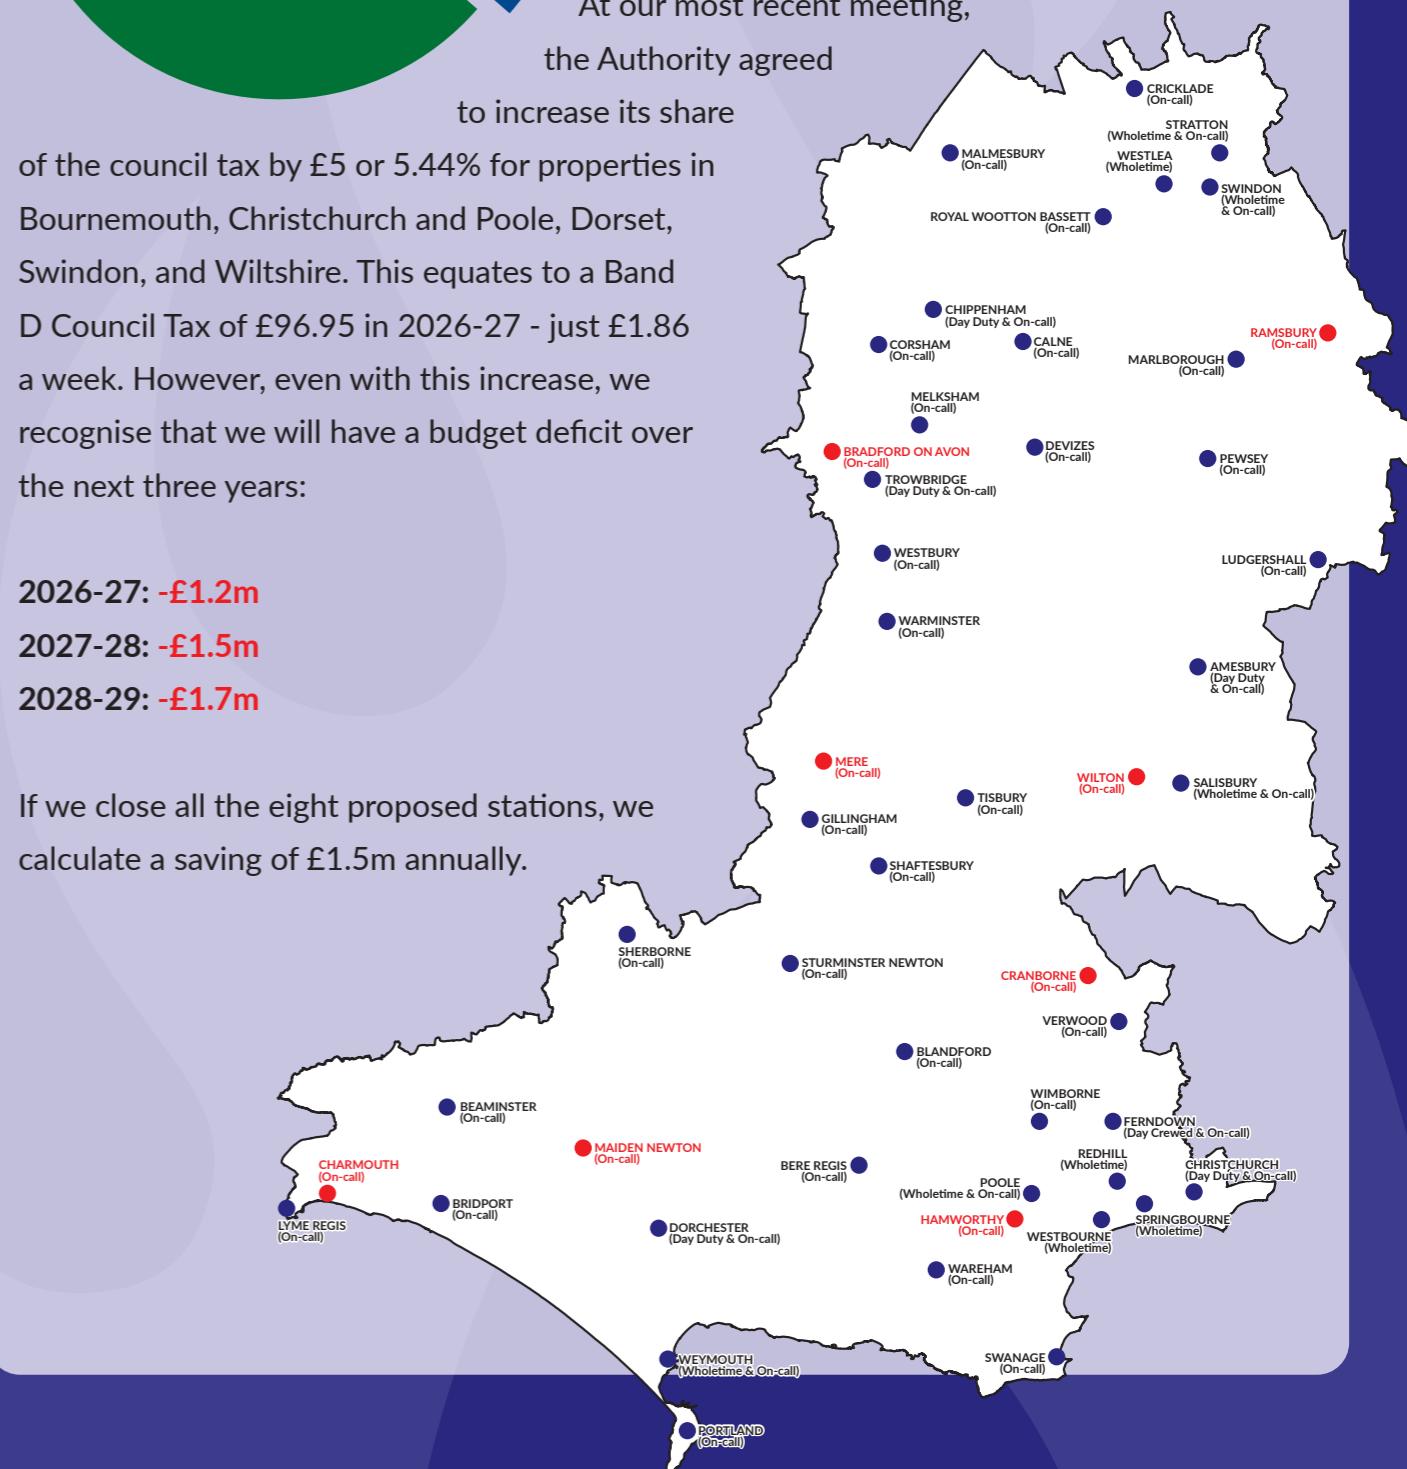

of the council tax by £5 or 5.44% for properties in Bournemouth, Christchurch and Poole, Dorset, Swindon, and Wiltshire. This equates to a Band D Council Tax of £96.95 in 2026-27 - just £1.86 a week. However, even with this increase, we recognise that we will have a budget deficit over the next three years:

2026-27: **-£1.2m**

2027-28: **-£1.5m**

2028-29: **-£1.7m**

If we close all the eight proposed stations, we calculate a saving of £1.5m annually.

BRADFORD ON AVON FIRE STATION

About your station

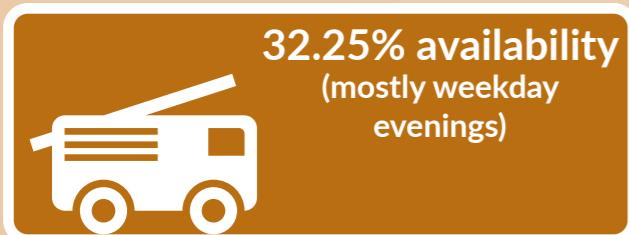

Your area

Bradford on Avon is a market town on the western edge of Wiltshire, close to Trowbridge and Melksham. The station area covers approximately 45 sq km. There are no significant future developments planned.

Current availability and response times

How often is my station needed?*

* Figures based on a yearly average taken over a five year period

Station costs

What changes if my station closes?

When the station is unavailable, or if it were to be closed, a fire engine from another station responds. At the moment this happens 67.75% of the time.

We currently use, and would continue to use, the nearest fire engines to Bradford on Avon. These are:

Trowbridge (2 fire engines) with 8 minutes travel time
Melksham (1 fire engine) with 16 minutes travel time
Corsham (1 fire engine) with 19 minutes travel time
Bath (Avon FRS) with 16 minutes travel time

Times based on normal road speed. This will be quicker using blue lights.

How to get involved

Join our public meetings:

At United Church Hall, 10 St Margaret's Street, Bradford on Avon BA15 1DD

On Tuesday 3rd March, 6pm - 8pm or Wednesday 4th March, 10:30am - 12:30pm

Alternatively, join
our online meeting
on Thursday 16th
April, 12pm - 1pm.
