Fall from height

Query:

I am looking for some information regarding an incident in Chippenham on the evening of Friday 20th March 2026, regarding a fall from height.

Please see below for what I would like:

- How many crews attended?
- Which stations did these crews come from?
- Were these crews Whole time or Retained (which crews were which)?
- In what order did these crews arrive on scene (with timings if possible)?
