

Freedom of Information Request FOI 26 125

Foam (PFAS) Usage

Query:

It would be very beneficial for our investigation if we could take part of any event in your area where foam has been used throughout history. It would be great if the spreadsheet could include date of event, location of event and a description of what occurred (i.e. how much foam was used, what kind of foam, what happened to the foam etc).

Response:

Please see the attached spreadsheet for the information requested.

Please note the following in relation to foam:

1. All known foam discharges with dates and quantities is not known.
2. We can only provide information for the last ten years due to retention periods.
3. The foam types we use are Forexpan Class A and VaPurex Class B. The Class B foam is synthetic fluorine free bio degradable foam.
4. All our legacy foams were disposed of four years ago before the legislation change around PFAS, PFOA and flouro-protein foams came in.

Information/Detail accurate on the date provided: 14th, July 2026
